How worthwhile was each course component for learning the material and improving your course grade?

Textbook
Lecture note packets
Sapling online homework
Graded homework problems
Course website
Clicker questions in class
Exam review sheets
Sample exams
OLC study group
Post-Exam Reflection “Wrapper” Surveys
Educator.com lectures
Other:

How would you describe your level of commitment to this course throughout the quarter?

100% committed and did all work suggested by the instructor
It was a high priority and I did most of the suggested work/activities
The course is important to me, but I was unable to put in the time and effort I wanted to
This is a hard course so I was not really expecting to pass it.

As a result of this course, I thought about my learning (metacognition) and reflected on my study strategies a lot this quarter.

I thought about my learning and study strategies more in this class than in most classes.

I learned new, effective study strategies in this course.
We engaged in several metacognitive lessons this quarter (growth mindset, importance of failure, exam wrappers, study cycle). How likely is it that your course grade improved as a result of these lessons?

Has your participation in an OLC changed your attitudes about study groups?

a. N/A (I did not join an OLC)
b. I have used study groups in the past and will continue to do so in future classes
c. I have not participated in study groups in the past, but now I will definitely do so in future classes
d. I have not participated in study groups in the past, but I may continue to explore them in the future
e. I have not participated in study groups in the past, and I am unlikely to use them in the future

Overall, I found the OLC to be a positive experience.

a. Strongly Agree b. Agree c. Disagree d. Strongly Disagree e. N/A (didn’t join OLC)

I would have done just as well in this course without a study group.

a. Strongly Agree b. Agree c. Disagree d. Strongly Disagree e. N/A (didn’t join OLC)

Like a muscle, your brain can grow.

You can learn new things, but you can’t really change your basic intelligence.

Your talent in a given area is not something you can change very much.

If you are a smart person, you won’t have to study a lot or work hard.

Active learning and peer-to-peer learning strategies can significantly improve student success.
